

Rossano Veneto, 10th June 2019**TO ALL OUR CLIENTS****SUBJECT: NEW LASER-MARKING.****Kind Customer,**

We are pleased to inform you that the purchase of a new laser-marking equipment allows us the following improvements:

- On each spring will be reported its code for unequivocal identification
- The new laser achieves a more defined, clear and readable marking.

The marking will be composed in this sequence:

- 1) Written "BORDIGNON", which identifies the name of the producer.
- 2) Alphanumeric code of the spring (for example: 1L51075).
- 3) Logo.

Old marking

New marking

Given the size of our stock of already marked and packaged springs ready for delivery, it will be necessary to take into account a certain period of time during which springs can be supplied with the old marking. The duration of this overlap may vary depending on the code, since there are, as is known, sizes of springs much more sold than others.

As in the past, we mark our springs starting from the 19 mm diameter.

Best regards,

Franco Brunello
